DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 05/06/2004, 04/03/2006, 10/17/2007 and 12/31/2009 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sylvia Chen on 3/30/2010.

The application has been amended as follows:

- a) The recitation in line 9 of claim 1 "enabling the adaptive event code" is changed to "enabling, using a processing unit, the adaptive event code"
- b) The recitation in page 9 lines 7-11 "The frame table 154, the macro table 156 and the parameter table 158 can have respective configuration registers 172, 174 and 176. Each of these configuration registers 172, 175 and 176 can include start and end pointers for respectively defining the first and last entries of a corresponding frame table 154, a macro table 156 and a parameter table 158" is changed to "The frame table 154, the

macro table 156 and the parameter table 158 can have respective configuration registers 172, 174 and 176. Each of these configuration registers 172, 174 and 176 can include start and end pointers for respectively defining the first and last entries of a corresponding frame table 154, a macro table 156 and a parameter table 158” (emphasis added)

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner’s statement of reasons for allowance: claims 1-21 are allowed because a comprehensive search of prior art failed to teach, either alone or in combination, generating at least one adaptive event code, wherein the adaptive event code corresponds to a preexisting event code, storing the adaptive event code in at least one table, running the table, wherein the adaptive event codes are at least initially disabled, and enabling the adaptive event code in response to a system event, wherein the preexisting event code that corresponds to the enabled adaptive event code is executed, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a) Vaglica (US 6125404 A) discloses a data processing system having a protocol timer for autonomously providing time based interrupts.
- b) Hisano (US 20040204032 A1) discloses a wireless communication system using variable band width.
- c) Garner (US 6112085 A) discloses a virtual network configuration and management system for satellite communication system.
- d) Fong (US 20040229604 A1) discloses an autonomous mode transmission from a mobile station.
- e) Abrol (US 20040162061 A1) discloses a mobile station application to identify specified events.
- f) Norman (US 6657977 B1) discloses a radio with burst event execution apparatus and method therefore.
- g) Miller (US 7537167 B1) discloses a modular, portable data processing terminal for use in a radio frequency communication network.
